

Chemtrails, Nanoaluminum and
Neurodegenerative and Neurodevelopmental Effects

Russell L. Blaylock, M.D., Visiting Professor Biology,
Belhaven University, Theoretical Neurosciences Research, LLC

Below are key excerpts from Dr. Blaylocks article. The headings have been added to make your research faster and easier.

There is evidence of nano-aluminum being sprayed in chemtrails:

"...there is evidence that they are spraying tons of nanosized aluminum compounds."

Nano-aluminum causes inflammation:

"It has been demonstrated in the scientific and medical literature that nanosized particles are infinitely more reactive and induce intense inflammation in a number of tissues. Of special concern is the effect of these nanoparticles on the brain and spinal cord, as a growing list of neurodegenerative diseases, including Alzheimer's dementia, Parkinson's disease and Lou Gehrig's disease (ALS) are strongly related to exposure to environmental aluminum."

"Inhaling this environmentally suspended nanoaluminum will also produce tremendous inflammatory reaction within the lungs, which will pose a significant hazard to children and adults with asthma and pulmonary diseases."

Nanoparticle aluminum enters the brain and causes disease:

"Nanoparticles of aluminum are not only infinitely more inflammatory, they also easily penetrate the brain by a number of routes, including the blood and olfactory nerves (the smell nerves in the nose). Studies have shown that these particles pass along the olfactory neural tracts, which connect directly to the area of the brain that is not only most effected by Alzheimer's disease, but also the earliest affected in the course of the disease. It also has the highest level of brain aluminum in Alzheimer's cases."

Inhaling nanoaluminum is dangerous to everyone, especially older people:

"The intranasal route of exposure makes spraying of massive amounts of nanoaluminum into the skies especially hazardous, as it will be inhaled by people of all ages, including babies"

and small children for many hours. We know that older people have the greatest reaction to this airborne aluminum."

Home filtration devices typically don't remove nanoparticles from the air:

"Because of the nanosizing of the aluminum particles being used, home filtering system will not remove the aluminum, thus prolonging exposure, even indoors."

Nanoaluminum will contaminate food and water:

"In addition to inhaling nanoaluminum, such spraying will saturate the ground, water and vegetation with high levels of aluminum."

"Once the soil, plants and water sources are heavily contaminated there will be no way to reverse the damage that has been done."

Nanoaluminum is efficiently absorbed in the GI tract:

"Normally, aluminum is poorly absorbed from the GI tract, but nanoaluminum is absorbed in much higher amounts."

Aluminum is distributed to several organs, including the brain:

"This absorbed aluminum has been shown to be distributed to a number of organs and tissues including the brain and spinal cord."

Dr. Blaylocks plea for understanding:

"I pray that the pilots who are spraying this dangerous substance fully understand that they are destroying the life and health of their families as well. This is also true of our political officials."

Steps need to be taken now to prevent an impending health disaster of enormous proportions if this project is not stopped immediately. Otherwise we will see an explosive increase in neurodegenerative diseases occurring in adults and the elderly in unprecedented rates as well as neurodevelopmental disorders in our children. We are already seeing a dramatic increase in these neurological disorders and it is occurring in younger people than ever before."
